and aiming in a variety of applications: smokefilled night clubs, lecture halls, art projects, factories, where accurate positioning and protection from weather or airborne particulates is required. Now available with a Turtle Base floorstand accessory.

This sturdy accessory

horizontal pipe or truss, for flexible positioning

attaches safely to any vertical 2"/50mm diameter pipe or

6500.XYZ.TB Tempest XYZ Mount Turtle Base - use with 6500.XYZ to make a sturdy floorstand

Now Tempest's popular Blizzard[™] projector enclosures and Thunder[™] Lighting enclosures are even more useful! This mount is easy to install and allows you to hang the enclosure virually anywhere, at virtually any angle, without sacrificing the great protection offered by your Tempest enclosure.

Whether installing outdoors for weather protection, with Blizzard HUSH[™] for silent running in classrooms and lecture halls, or in heavy industrial locations where dust and smoke are the enemy, the XYZ Mount allows you to project what you want, where you want, in any environment.

Vertical adjustment is 60° (up) to 90° (vertical down), subject to the permissible installed angle of your projector. Please check with your projector manufacturer.

The Blizzard XYZ Mount features a safety collar that bolts through the hanging pole (by others), with 360° horizontal rotation and positive locking.

In the interest of continuous product improvement, specifications are subject to change without notice
