

Fuse/MX Wallmount Kits

The new Fuse and MX linear fixtures, now available in 48" and 12" lengths, and brighter than ever, are another breakthrough for Philips Color Kinetics. Now you can use these handy wallmount kits, in three convenient offset lengths. Mount as shown for up-lighting, or simply flip upside down for grazing down a wall. Order one kit per fixture.

For Use with:
 Philips Color Kinetics Fuse
 Philips Color Kinetics MX

These mounting kits provide an easy and flexible wall-mounting solution for any length of Fuse or MX linear fixture.

Each kit comprises two brackets and two wall plates, plus hardware. Just fix the plates to the wall in the approximate position required, then attach the brackets to the fixture and mount the assembly to the plates. The plates allow for horizontal adjustment, so exact positioning is not critical.

The kits come complete with hardware and are available in a variety of stand-

off lengths. The standoff length is the distance from the wall to the center of the Fuse or MX fixture.

Don't forget to check out Tempest's extensive line of symmetrical and asymmetric louvers to finish off your installation!
