

Universal Trombone Wallmount Arms

These rugged and adjustable stainless steel arms allow you to mount any Philips Color Kinetics Graze, Vaya Linear, Vaya Wash, Blast, Burst or Compact Burst luminaire (even Landscape NPT Versions) to any wall, at a range of offset distances.

For Use with:

- Philips Color Kinetics Graze, all models
- Philips Color Kinetics Graze Vaya Linear and Wash, all models
- Philips Color Kinetics Blast, Burst, Compact Burst, all models

These universal arms come with hardware to mount any Philips Color Kinetics Graze and Vaya luminaire.

Simply drill out the knockout ring and you have a wallmount arm for any landscape fixture with 1/2" NPT stem!

Add the optional Adapter Plate to attach any Blast, Burst or

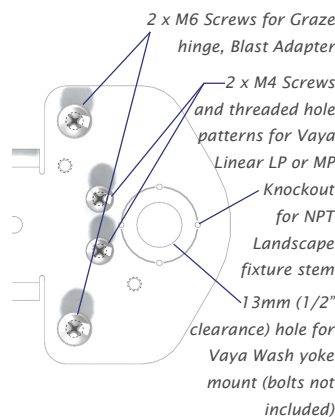

Compact Burst fixture — note that the wall offset increases by 2.5in [6cm] with the adapter plate fitted.

Arms are made of heavy gauge stainless steel for excellent corrosion resistance and great strength. Arms may be mounted on a heavy duty US 4" J-Box (installer is responsible for mounting strength and structural integrity).

The luminaire leader cables may be neatly dressed on the underside of the arm back to the wall, with the nylon ties provided.

Note: 4789 Series arms replace Tempest 4751 and 4781 series Arms.

Part Number	Description	✓
4789.T.0812	Universal Trombone Arm, 8-12in [19-30cm]
