

Enclosures (of course!)

*Custom Mirror
Projector Mount*

Custom Lens Mount

*Cinema
Exhaust Adapter*

Custom Kiosk Design

*Custom Amp Rack
(active cooling)*

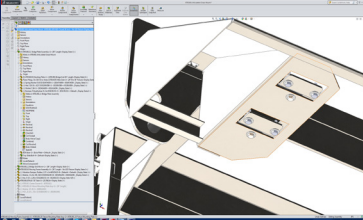

**We don't only make
enclosures.**

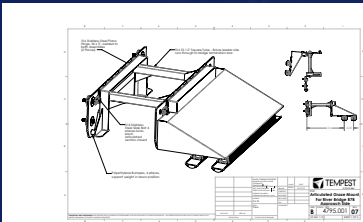

**We'll make your
Widgets
too!**

**Custom mounts, baffles, brackets,
kiosks, hoists, specials, whatsits,
thingumyjigs...**

**If you need it, we'll design and
build it for you.
Any widget. Any quantity.**

3D CAD design & walkthrough

Shop drawings review/approval

Precision laser cutting and

...forming, direct from CAD files

...and on its way to you.

End-to-end Design and Manufacturing. For You.

Tempest offers a complete set of design and small-to-medium batch manufacturing capabilities, for a wide range of audiovisual OEM and custom parts, accessories and other items.

It's about People

We live and breathe entertainment technology products; time was we were out there using them, so we get it.

It's about Equipment

State-of-the-art integrated CAD-CAM systems make it all possible. 3D modeling dramatically reduces prototype issues, improves design accuracy, and lets us walk you through the design on a video call, so you can see exactly what we are doing for you at every stage.

Solidworks CAD files feed directly into our manufacturing software packages — so what we cut on our lasers or form in our bending shop will be exactly what we walked you through on line. Very cool, very efficient.

And we can easily provide line drawings and renderings for submittals, catalogs and instruction sheets — totally accurate, professional, quick and easy.

It's about Service

We're going to look after you. Period. That's easy when things go right. But occasionally they don't, and that's when you'll be glad you picked Tempest. We'll move heaven and earth to address any problems that might arise, guaranteed.

You want to work with a partner you can trust. That partner is Tempest.

TEMPEST

It's a promise.

Whether you can't spare the engineering resources or if there just isn't time, we'll treat your project as if it was our own. With all the passion that goes into everything we do.

Email, or call me direct, and let's talk about your next custom or OEM product.
